## Summary

I am a person who is positive about every aspect of life. There are many things I like to do, to see, and to experience. I like to read lots of interesting books, I am passionate about learning new things and expanding my knowledge, especially in the spheres related to python-based artificial intelligence. I am good at math and programming. Currently I am a middle level developer in Oracle Sql database and studying artificial intelligence based on python. I want to create a system based on artificial intelligence and SQL that helps people to perform daily tasks and use it on robots.

## Experience

### Data Scientist

Freelance

Jul 2023 - Present (1 month)

### Back End Developer

Green White Solutions

Jan 2020 - Jun 2023 (3 years 6 months)

I had the opportunity to work as an intern-mid Oracle developer where I gained valuable experience in utilizing various technologies and frameworks. My primary focus was on Oracle DB, PI/SQL, JavaScript, HTML, CSS, and I also worked with frameworks like Bootstrap and AngularJS.

During my time as an intern-mid Oracle developer, one of my key responsibilities was to migrate old data to new tables. This involved understanding the existing data structure, designing the new tables, and writing efficient scripts to transfer the data seamlessly. This experience allowed me to enhance my skills in data migration and database management.

In addition to data migration, I also had the chance to work on developing applications using Oracle DB and PI/SQL. I collaborated with a team of developers to design and implement solutions that met the client's requirements. This involved writing complex queries, creating stored procedures, triggers, and functions in PI/SQL, as well as integrating front-end technologies like JavaScript, HTML, and CSS to deliver user-friendly interfaces.

Furthermore, I had the opportunity to work with frameworks like Bootstrap and AngularJS to enhance the user experience and make the applications responsive and interactive. These frameworks helped me streamline the development process and create visually appealing interfaces.

Overall, my experience as an intern-mid Oracle developer allowed me to gain hands-on experience with Oracle DB, PI/SQL, JavaScript, HTML, CSS, as well as frameworks like Bootstrap and AngularJS. The opportunity to migrate old data to new tables further strengthened my skills in data management.

I am confident that these experiences have prepared me for future challenges in the field of software development.

## Education

### **Tashkent State University of Economics**

Bachelor's degree, Information technology in economics

2016 - 2020

## Skills

Sklearn • Plotly • Pandas • Python • Data Science • Data Visualization • Databases • English •  
Pandas (Software) • Anaconda
